What is \LaTeX ?

\LaTeX is not a text editor like Word!

Philosophy behind it

\LaTeX was developed

- ▶ to allow anybody to produce high-quality books and articles using minimal effort;
- ▶ and to provide a system that would give exactly the same results on all computers, at any point in time;
- ▶ you need not worry about the layout, only the contents

Why \LaTeX ?

You should use \LaTeX because

- ▶ it allows you to produce high-quality books and articles using minimal effort;
- ▶ and it provides a system that would give exactly the same results on all computers, at any point in time;
- ▶ you need not worry about the layout, only the contents

Why \LaTeX ?

- ▶ anything is possible in \LaTeX ;
- ▶ you can define your own commands and macros;
- ▶ making a bibliography is very easy;
- ▶ good support for other scripts, graphs, tables and equations;
- ▶ it allows for modular documents;
- ▶ it's pretty...

“Can I do this in \LaTeX ?”
Yes.

“Why would you want to be able to do this? Like, who wants a table in a superscript in a footnote?”

That question is meaningless.

Making a document

Go ahead!

Commands

- ▶ commands start with a backslash
- ▶ they can take arguments:
 - ▶ obligatory arguments are in curly brackets: {...}
 - ▶ optional arguments are in square brackets: [...]

Document structure

- ▶ Preamble
 - ▶ `\documentclass[...]{...}`
 - ▶ `\usepackage[...]{...}`
 - ▶ `\maketitle`
- ▶ Body
 - ▶ always starts with `\begin{document}`
 - ▶ always ends with `\end{document}`

Basic text editing

- ▶ Newlines
- ▶ Quotation marks
- ▶ `\textit{...}` (Ctrl+i)
- ▶ `\textbf{...}` (Ctrl+b)
- ▶ `\textsc{...}`

Basic text editing

Font sizes

- ▶ `\tiny`
- ▶ `\scriptsize`
- ▶ `\footnotesize`
- ▶ `\small`
- ▶ `\normalsize`
- ▶ `\large`
- ▶ `\Large`
- ▶ `\LARGE`
- ▶ `\huge`
- ▶ `\Huge`
